Info

We are no longer working on the Unity version of Giftscop. We are instead focused on bringing improvements to the [PlayStation version](#).

If you are unable to use a PlayStation or emulator, we are also working on a [browser version](#) using the same engine as the PlayStation version.

Information

Last updated August 30, 2026

[Changelog](#)

You may report bugs in the #bug-reports channel on [our Discord server](#), along with steps to reproduce the bug.

**Notice**

The archive has been removed due to a security vulnerability impacting **all Unity projects** built with Unity 2017.1 onwards.

While this should not affect Giftscop in any way, just to be safe we have removed the download links for builds impacted by this discovery. The current release, 1.2.1, was built with Unity 2019.1.15f1, which patches the issue.

More information can be found [here](#). Note that while Unity released a tool to patch existing builds, it is not compatible with Giftscop.
