

PlayStation Homebrew

Recently, we have made progress on replicating Petscop as a **PlayStation 1 homebrew** version of Giftscop.

Through this version, you can play our replica of Petscop on actual PlayStation 1 hardware, and it is available for download today. It can also be played in an emulator if you do not have a PlayStation.

Our goal is for this to reach parity with the Unity version of Giftscop and then go beyond. After the PlayStation version reaches parity on content from the Petscop videos, we plan to deprecate the Unity version of Giftscop.

If you would like to try it, the latest ROM may be found below (or on our [downloads page](#)):

 Download

Left and right inputs ( and ) are reversed. **This is intentional**, as several parts of the original videos (e.g. Sound Test, the house calendars, the controls menu) suggest this is how Petscop functions.

Why

Authenticity

Having Giftscop function on an actual PlayStation brings us closer to achieving our original goal of recreating Petscop itself: The in-universe Petscop is a PlayStation game, so Giftscop is more accurate

if it also runs on PlayStation.

Technical Interest

Programming for the original PlayStation introduces unique and interesting challenges that are absent when using an engine like Unity, like for prior versions of Giftscop.

We have had to replace a number of Unity's built-in systems in order to fine-tune certain behaviors, or resolve obscure bugs. Writing the project in this way allows us to build our own engine which, while more challenging to implement, may be tailored precisely to the needs of our project.

Addressing Misinformation

We have observed a public perception that Petscop could not possibly function as an actual PlayStation game for one reason or another. For instance, people may claim that the lighting is too advanced, or that features like generation of Child Library rooms were beyond the PlayStation's capabilities.

To be blunt, these people do not know what they are talking about.

As we have worked on this, we have successfully implemented features of Petscop that were commonly claimed to be impossible on PlayStation. For instance:

- Dynamic lighting in Newmaker Plane rooms
- "Infinite" Newmaker Plane
- Semitransparent objects (e.g. "caught" text fading out when catching a pet)
- Draw Mode
- "Procedural generation" of Child Library rooms
- "High-poly" models like the bucket or tool

While there are a few details which must be changed for the game to function on PlayStation, these are largely superficial. For instance, some sound effects need to be compressed more than in the videos, but this does not result in any major differences.

How

The PlayStation version of Giftscop shares no code with prior versions, but this does not mean previous work will go to waste.

To build the PlayStation version, we have constructed a toolchain to non-destructively convert data—such as rooms, textures, models, audio, and so on—from Giftscop into formats that are usable in the PlayStation version. We do not use any preexisting tools for data conversion, as a customized workflow allows us to make progress more efficiently.

All code had to be rewritten, however the logic is largely based on what we did in prior versions of Giftscop; existing Giftscop code serves as a useful reference when re-implementing Petscop for PlayStation. The PlayStation version is written entirely in C.

Progress & Roadmap

- ✓ Finished / mostly finished
- ✓ Not finished

Rooms

- ✓ Title screen
- ✓ Gift Plane
- ✓ Even Care
 - ✓ Entrance room
 - ✓ Hallway to Amber's room
 - ✓ Amber's room
 - ✓ Roneth's room
 - ✓ Pen's room
 - ✓ Path to Randice & Wavey's room
 - ✓ Randice & Wavey's room
- ✓ Newmaker Plane
- ✓ Windmill interior
- ✓ Underground (area 1)
 - ✓ Cellar
 - ✓ Hallway to office
 - ✓ Office
 - ✓ Hallway from office to road
 - ✓ Road
 - ✓ Driving scene
 - ✓ "Good grief and alas" room
 - ✓ Child Library entrance
 - ✓ Child Library bedroom
 - ✓ Figure on the bed
 - ✓ Lina picnic room (containing present with green key)
 - ✓ Picnic room exit (containing present that plays chorus sound)
- ✓ Underground (area 2)
 - ✓ Outside shed (with Mike's grave)
 - ✓ Inside shed
 - ✓ Under shed (with Care NLM)
 - ✓ Tunnel behind shed
 - ✓ Outside tool room
 - ✓ Tool room (with Windmill screen)
 - ✓ Red tool
 - ✓ Pink tool
 - ✓ Events that occur while watching the windmill (optional)
 - ✓ Outside Quitter's Room
 - ✓ Quitter's Room hallways
 - ✓ Quitter's Room
 - ✓ Freeing Tiara
 - ✓ Staircase to surface
- ✓ "Odd Care"
 - ✓ Entrance room
 - ✓ Hallway to Amber's room
 - ✓ Amber's room
 - ✓ Pen's room
 - ✓ Game crash

- ✓ Panicsv
- ✓ The House
 - ✓ Living Room
 - ✓ Bathroom
 - ✓ Care's room
 - ✓ Catching Care A
 - ✓ Parents' room
 - ✓ Garage
 - ✓ Tarnacop / Discovery Pages slideshow
- ✓ The School
 - ✓ Floor 1 first-person area
 - ✓ Padlock
 - ✓ New life letter
 - ✓ Eggs
 - ✓ Floor 1 classroom
 - ✓ Needles Piano
 - ✓ Floor 2 first-person area
 - ✓ Guided movement
 - ✓ Counselor scene
 - ✓ Graverobber
 - ✓ Girl letters and *girl-world* music
 - ✓ Floor 2 classroom
 - ✓ Floor 3 first-person area
 - ✓ Floor 3 classroom
 - ✓ Basement staircase
 - ✓ Walking to the side
 - ✓ Basement
 - ✓ Pushable objects
 - ✓ Care B
 - ✓ Machine room
 - ✓ Inserting pieces into the machine
 - ✓ Needles Piano
 - ✓ Egg
- ✓ Soundtrack ending room

Features

- ✓ Garalina logo
- ✓ Pause menu
 - ✓ Main menu
 - ✓ Options
 - ✓ Volume
 - ✓ Graphics
 - ✓ Controls
 - ✓ Sound Test

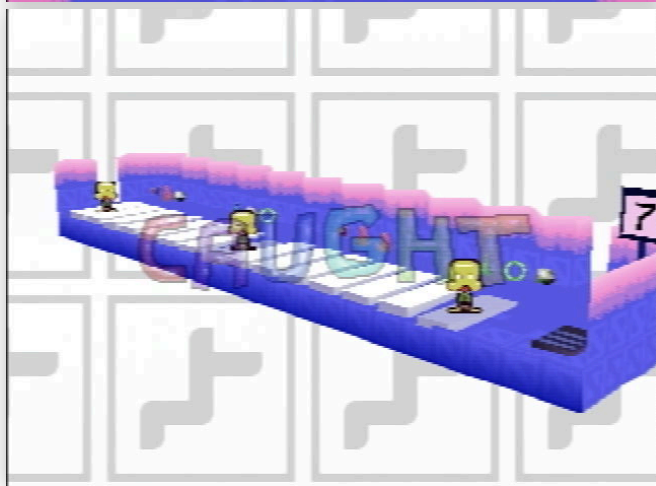

- ✓ Secret menu
 - ✓ All Recordings
 - ✓ Room Impulse
 - ✓ Extra Stuff...
- ✓ Pets
- ✓ Book of Baby Names
- ✓ Quit Game
- ✓ Pets
 - ✓ Amber
 - ✓ Randice
 - ✓ Pen
 - ✓ Toneth
 - ✓ Roneth
 - ✓ Wavey
 - ✓ Care A
 - ✓ Care B
 - ✓ Care NLM
- ✓ Save files
- ✓ Recordings
 - ✓ Creation & storage
 - ✓ Demo playback
 - ✓ Ghost playback
 - ✓ Recordings stored on the CD
- ✓ Draw Mode
- ✓ P2 to TALK
- ✓ Needles Piano
 - ✓ Musical input
 - ✓ Realtime audio synthesis
- ✓ Multiplayer
- ✓ Child Library face system
 - ✓ Face creation
 - ✓ Room generation
- ✓ Burn-in Monitor
